

SOUTHEAST GAP ANALYSIS PROJECT

Species Modeling Report

Florida Softshell

Apalone ferox

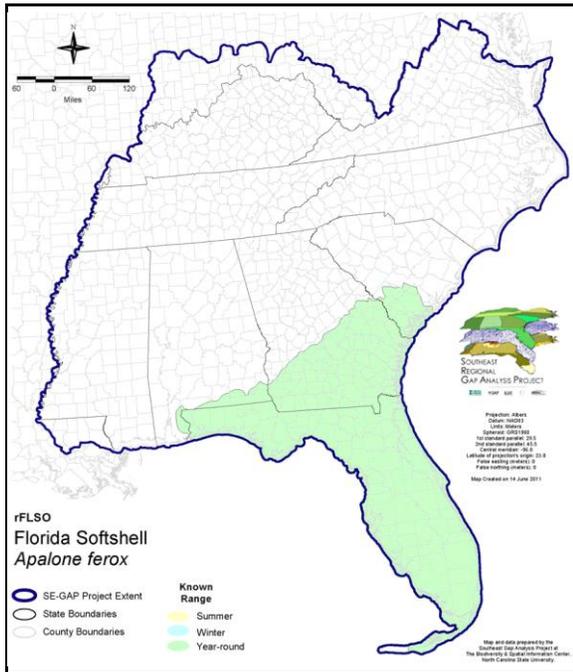

Taxa: Reptilian
 Order: Cryptodeira
 Family: Trionychidae

SE-GAP Spp Code: **rFLSO**

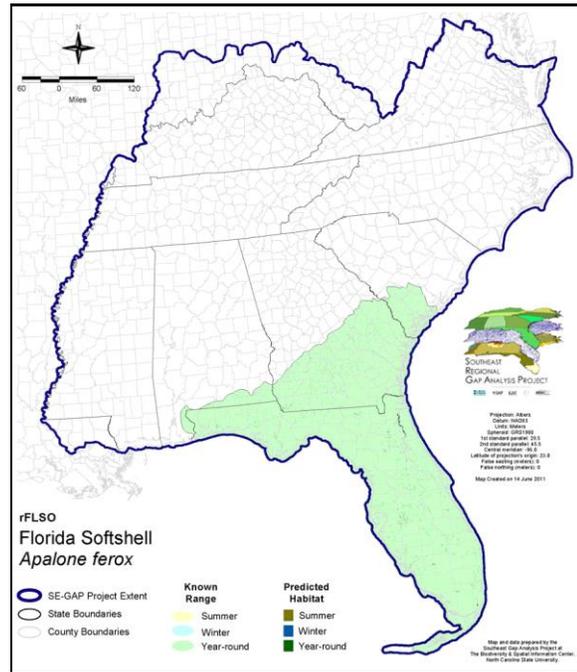

ITIS Species Code: 208675

NatureServe Element Code: ARAAG01010

KNOWN RANGE:

PREDICTED HABITAT:

Range Map Link: http://www.basic.ncsu.edu/segap/datazip/maps/SE_Range_rFLSO.pdf

Predicted Habitat Map Link: http://www.basic.ncsu.edu/segap/datazip/maps/SE_Dist_rFLSO.pdf

GAP Online Tool Link: <http://www.gapservice.ncsu.edu/segap/segap/index2.php?species=rFLSO>

Data Download: http://www.basic.ncsu.edu/segap/datazip/region/vert/rFLSO_se00.zip

PROTECTION STATUS:

Reported on March 14, 2011

Federal Status: ---

State Status: AL (PSNG), FL (N)

NS Global Rank: G5

NS State Rank: AL (S2), FL (S5), GA (S5), SC (SNR)

SUMMARY OF PREDICTED HABITAT BY MANAGMENT AND GAP PROTECTION STATUS:

Total	10,174.0	76	448.0	3	13,306.8	100		

GAP Status 1: An area having permanent protection from conversion of natural land cover and a mandated management plan in operation to maintain a natural state within which disturbance events (of natural type, frequency, and intensity) are allowed to proceed without interference or are mimicked through management.

GAP Status 2: An area having permanent protection from conversion of natural land cover and a mandated management plan in operation to maintain a primarily natural state, but which may receive use or management practices that degrade the quality of existing natural communities.

GAP Status 3: An area having permanent protection from conversion of natural land cover for the majority of the area, but subject to extractive uses of either a broad, low-intensity type or localized intense type. It also confers protection to federally listed endangered and threatened species throughout the area.

GAP Status 4: Lack of irrevocable easement or mandate to prevent conversion of natural habitat types to anthropogenic habitat types. Allows for intensive use throughout the tract. Also includes those tracts for which the existence of such restrictions or sufficient information to establish a higher status is unknown.

PREDICTED HABITAT MODEL(S):

Year-round Model:

Habitat Description: Florida softshell turtles occur in all freshwater habitats including ponds, lakes, canals, and sluggish rivers or streams, where they spend much time on the bottom, leaving the water only to bask and to lay eggs. They prefer still waters with sand or mud-bottoms especially where there is overhead foliage (Ernst et al. 1994). Amy Silvano 8jul05

Ecosystem Classifiers: Aquatic species, selected MU's refer to nesting habitat only. Amy Silvano 08jul05

Hydrography Mask:

Freshwater Only

Slow Current Only

Utilizes flowing water features with buffers of 60m from and unlimited into selected water features.

Utilizes open water features with buffers of 60m from and 60m into selected water features.

Utilizes wet vegetation features with buffer of unlimited into selected vegetation features.

Selected Map Units:

Functional Group	Map Unit Name
Anthropogenic	Bare Sand
Anthropogenic	Bare Soil
Beach	Unconsolidated Shore (Beach/Dune)
Water	Open Water (Fresh)
Wetlands	Unconsolidated Shore (Lake/River/Pond)
