

SOUTHEAST GAP ANALYSIS PROJECT

Species Modeling Report

American Robin

Turdus migratorius

Taxa: Avian

Order: Passeriformes

Family: Turdidae

SE-GAP Spp Code: **bAMRO**

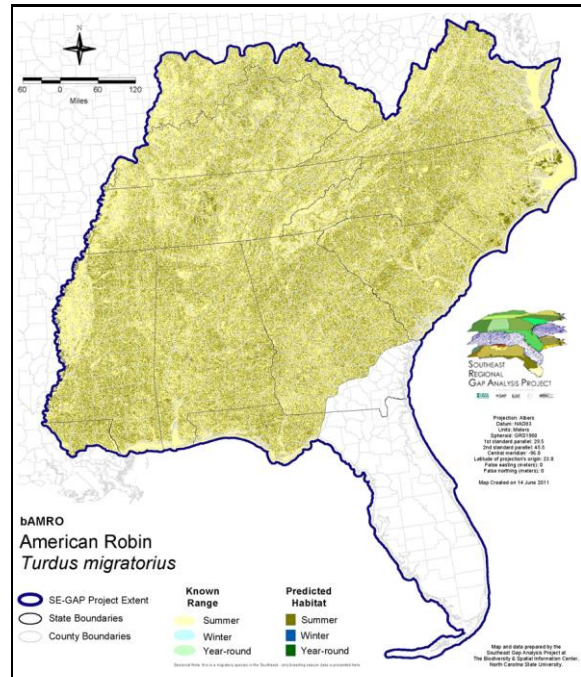

ITIS Species Code: 179759

NatureServe Element Code: ABPBJ20170

KNOWN RANGE:

PREDICTED HABITAT:

Range Map Link: http://www.basic.ncsu.edu/segap/datazip/maps/SE_Range_bAMRO.pdf

Predicted Habitat Map Link: http://www.basic.ncsu.edu/segap/datazip/maps/SE_Dist_bAMRO.pdf

GAP Status 1: An area having permanent protection from conversion of natural land cover and a mandated management plan in operation to maintain a natural state within which disturbance events (of natural type, frequency, and intensity) are allowed to proceed without interference or are mimicked through management.

GAP Status 2: An area having permanent protection from conversion of natural land cover and a mandated management plan in operation to maintain a primarily natural state, but which may receive use or management practices that degrade the quality of existing natural communities.

GAP Status 3: An area having permanent protection from conversion of natural land cover for the majority of the area, but subject to extractive uses of either a broad, low-intensity type or localized intense type. It also confers protection to federally listed endangered and threatened species throughout the area.

GAP Status 4: Lack of irrevocable easement or mandate to prevent conversion of natural habitat types to anthropogenic habitat types. Allows for intensive use throughout the tract. Also includes those tracts for which the existence of such restrictions or sufficient information to establish a higher status is unknown.

PREDICTED HABITAT MODEL(S):

Summer Model:

Habitat Description: American Robins are found across the southeast but are absent from the barrier islands. They are habitat generalists, robins are found in a variety of habitats such as forests, farmlands, cities, and towns. Two important habitat requirements for the species are nest trees and mud to construct nests (Kaufman 1996). They are associated with forest edges.

Nest is constructed in the crotch or the fork of a horizontal branch of a shrub, sapling, or tree. Occasionally it is built on ledges of buildings (Nicholson 1997).

Quoted from habitat notes - K. Cook - 4-17-08

Mask of Forest/Open Ecotone: Include within 60m of ecotone edge.

Mask of Woodlands and Shrublands: Include all woodland and shrubland interiors and 60m buffer from them.

Selected Map Units:

Functional Group	Map Unit Name
Anthropogenic	Deciduous Plantations
Anthropogenic	Developed Open Space
Anthropogenic	Evergreen Plantations
Anthropogenic	Low Intensity Developed
Anthropogenic	Medium Intensity Developed
Anthropogenic	Pasture/Hay
Anthropogenic	Successional Grassland/Herbaceous
Anthropogenic	Successional Grassland/Herbaceous (Other)
Anthropogenic	Successional Grassland/Herbaceous (Utility Swath)
Anthropogenic	Successional Shrub/Scrub (Clear Cut)
Anthropogenic	Successional Shrub/Scrub (Other)
Anthropogenic	Successional Shrub/Scrub (Utility Swath)
