

Species Modeling Report

Upland Sandpiper

Bartramia longicauda

Taxa: Avian

Order: Charadriiformes

Family: Scolopacidae

SE-GAP Spp Code: **bUPSA**

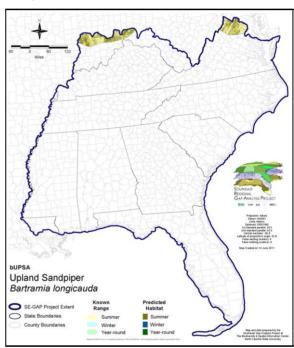

ITIS Species Code: 176610

NatureServe Element Code: ABNNF06010

KNOWN RANGE:

Upland Sandpiper Bartramia longicauda

PREDICTED HABITAT:

Range Map Link: http://www.basic.ncsu.edu/segap/datazip/maps/SE Range bUPSA.pdf

Predicted Habitat Map Link: http://www.basic.ncsu.edu/segap/datazip/maps/SE_Dist_bUPSA.pdf GAP Online Tool Link: http://www.gapserve.ncsu.edu/segap/segap/index2.php?species=bUPSA

Data Download: http://www.basic.ncsu.edu/segap/datazip/region/vert/bUPSA_se00.zip

PROTECTION STATUS:

Reported on March 14, 2011

Federal Status: ---

State Status: CT (E), CT (E), DE (E), DE (E), ID (P), ID (P), IL (LE), IN (SE), KY (H), MA (E), MD (E), ME (T), MN (NON), ND (Level I), NH (E), NJ (E), NV (YES), NY (T), OH (T), OR (SC), PA (PT), RI (State Endangered), UT (None), VA (LT), VA (LT), VT (E), WA (E), WI (SC/M), WI (SC/M), BC (2 (2005)), QC (Non suivie)

GAP Status 1: An area having permanent protection from conversion of natural land cover and a mandated management plan in operation to maintain a natural state within which disturbance events (of natural type, frequency, and intensity) are allowed to proceed without interference or are mimicked through management.

GAP Status 2: An area having permanent protection from conversion of natural land cover and a mandated management plan in operation to maintain a primarily natural state, but which may receive use or management practices that degrade the quality of existing natural communities.

GAP Status 3: An area having permanent protection from conversion of natural land cover for the majority of the area, but subject to extractive uses of either a broad, low-intensity type or localized intense type. It also confers protection to federally listed endangered and threatened species throughout the area.

GAP Status 4: Lack of irrevocable easement or mandate to prevent conversion of natural habitat types to anthropogenic habitat types. Allows for intensive use throughout the tract. Also includes those tracts for which the existence of such restrictions or sufficient information to establish a higher status is unknown.

PREDICTED HABITAT MODEL(S):

Summer Model:

Habitat Description: In general, uses dry grasslands with low to moderate forb cover, low woody cover, moderate grass cover,

moderate to high litter cover, and little bare ground. Prefers to forage among shorter vegetation in native

grasses as well as pastures and old fields and meadows. M. Rubino, 29dec04.

Functional Group	Map Unit Name
Anthropogenic	Developed Open Space
Anthropogenic	Pasture/Hay
Anthropogenic	Row Crop
Anthropogenic	Successional Grassland/Herbaceous
Anthropogenic	Successional Grassland/Herbaceous (Other)
Anthropogenic	Successional Grassland/Herbaceous (Utility Swath)
Prairie	Bluegrass Basin Savanna and Woodland
Prairie	Pennyroyal Karst Plain Prairie and Barrens
Prairie	Southern Ridge and Valley Patch Prairie
Prairie	Western Highland Rim Prairie and Barrens
